Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 12-17 and 19-22 are, drawn to a modular power tool.

Group II, claims 23-31 are, drawn to a method for assembling a modular tool.

Group III, claims 33-42 are, drawn to a modular power tool kit including a plurality of different sized motors.

Group IV, claim 43 is, drawn to a modular tool kit having left and right hand guard assemblies wherein the left hand guard assembly mounted on a first side of a handle in a right hand orientation and the right hand guard assembly mounted on a second side of a handle.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: groups I and III-IV lack the same or corresponding special technical features of group II because the modular power tool/modular power tool kit can be assembled by another and materially different method, group I lacks the same or corresponding special technical features of group III because group I does not require the plurality of different sized motors set forth

in group III, conversely, group III lacks the same or corresponding special technical features of group I because group III does not require a housing mounted on a first side of a handle in a left hand orientation and the housing is mounted on a second side of the handle in a right hand orientation set forth in group I, group I lacks the same or corresponding special technical features of group IV because group I does not require the left and right hand guard assemblies set forth in group IV, conversely, group IV lacks the same or corresponding special technical features of group I because group IV does not require the housing mounted on the first side of the handle in the left hand orientation and the housing is mounted on the second side of the handle in the right hand orientation set forth in group I, group IV lacks the same or corresponding special technical features of group III because group IV does not require the plurality of different sized motors set forth in group III, conversely, group III lacks the same or corresponding special technical features of group IV because group III does not require the left hand guard assembly mounted on the first side of the handle in the right hand orientation and the right hand guard assembly mounted on the second side of the handle set forth in group IV.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 3724

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Choi whose telephone number is 571-272-4504. The examiner can normally be reached on Monday-Thursday 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Boyer D. Ashley can be reached on 571-272-4502. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
